Duration: 2 Days

Pricing Public: \$545+GST per participant

Pricing Onsite: \$1500+GST per day plus materials, set up and extraneous expenses

Facilitation co-ordinated internally at your organisations facility.

FMEA Facilitation Onsite: \$1200+GST per day plus extraneous expenses as per a statement of work

FMEA teaches a disciplined method to organize potential failure modes and their effects and to establish associated resolution actions. The method applies to both products and manufacturing processes.

FMEA is a primary tool to identify and prevent potential problems during conceptualisation and design of product or processes. Preventing problems will result in: faster time to market, more PD Factory throughput, higher customer satisfaction, and reduced product campaigns.

After the completion of the course, participants will be able to:

- Identify what can be done to prevent things gone wrong
- Use related robustness techniques
- Distinguish between the four main types of FMEA
- Identify potential failure mode
- Identify the effects of failures
- Identify causes of failures
- Reduce cost and warranty
- Improve design verification
